ANNA PILI

Full-Stack Developer

Barcelona, Spain | pili.anna@outlook.com | linkedin.com/in/annapili-webdeveloper/ | github.com/Pannacodes |
Portfolio: anna-pili-portfolio.vercel.app

PROFILE

Full-Stack Developer with a background in environmental research, bringing an analytical, creative and problem-solving approach to software development. Trained in JavaScript, React, Node.js, Express and MongoDB, with an interest in UX/UI design and building intuitive, user-centred applications. Experience in international research and project-based teams has strengthened my adaptability, attention to detail and communication. Seeking a junior Software Developer role where I can build practical, user-focused solutions and grow within a collaborative team.

SKILLS

Hard Skills: JavaScript, TypeScript, HTML5, CSS3, React, Node.js, Express.js, MongoDB, REST APIs, JSON, Git & GitHub, Responsive Web Design, UX/UI Design, RStudio, Data Analysis

Soft Skills: Analytical & Creative Problem-Solving, Critical Thinking, Attention to Detail, Adaptability, Communication & Collaboration

Languages: English (Fluent), French (Native), Spanish (Fluent), Italian (Fluent), German (Fluent), Catalan (Beginner)

SELECTED PROJECTS

MyCircle | MongoDB, Express.js, React.js, Node.js, Tailwind CSS

- Developed a full-stack application designed to help private groups manage shared household tasks and activities. Focused on user authentication, group management and collaborative functionality.

PlacePulse | React.js, Tailwind CSS, React Router, Axios, JSON Server

- Developed a web application that allows users to explore and contribute locations while accessing environmental information through the Open-Meteo Air Quality API. Implemented CRUD functionality and API integration.

Dolphin Dash | HTML, CSS, JavaScript

- Developed an interactive browser-based game where players control a dolphin, collect fish and avoid marine pollution. Implemented game mechanics, collision detection, scoring, animations and sound effects.

EXPERIENCE

Full-Stack Developer | Freelance 2026 – Present

- Managed development workflows independently, from planning and UI/UX design to implementation, testing and deployment.
- Designed and developed full-stack web applications using JavaScript, React, Node.js, Express and MongoDB.

Sustainability Specialist | IKEA 09/2025 – 05/2026

- Coordinate internal teams and stakeholders to implement initiatives, monitor progress, and ensure alignment across functions.
- Support internal training, staff engagement, and project follow-up; organise and manage documentation and operational processes.

Research Assistant | BETA Technological Center 05/2024 – 10/2024

- Supported EU-funded research project through field data collection, organisation, and analysis in RStudio.
- Developed educational materials, including an online training course and an app.

EDUCATION

Ironhack | AI Web Development Bootcamp 2026

- Intensive full-stack bootcamp focused on JavaScript, React, Node.js, Express and MongoDB.

University of Bristol | MSc Global Wildlife Health and Conservation 2022 – 2023

- Specialised in wildlife conservation, research methodologies and data analysis.
